

JET-HOT

HIGH PERFORMANCE COATINGS

The Jet-Hot coatings warranty is the best in the industry. We offer a LIFETIME warranty to the original purchaser of our coating.

A coating is designed to protect the underlying material from severe stress in order to save the part. If our coating fails to do that when properly installed, used, and maintained we will recoat the part once for free.

Any coating failure within the first 6 months we will cover shipping charges to and from Jet-Hot. Warranty claims beyond six months from the date of the invoice, the customer is responsible for shipping to and from.

Coating failure means that the Jet-Hot coating failed due to improper application or the coating delivered was not the coating that was ordered. Coating failure does not apply to situations where the selected coating was not suitable for the application environment. (i.e. Using Extreme 1300 in an application where temperatures exceed 1300F).

If a coating has been used in an environment that exceeds its capacity, such as over temping, we offer two options:

- 1) We will recoat for 50% of the current price in the same coating up to one-time per year. You pay to ship both ways.
- 2) We will upgrade you to our Offroad 2000 or Ultra 2500 coating for the difference in price at the time of recoating. This new coating will then be covered by our regular warranty. You pay to ship both ways.

If you have a Jet-Hot coated part that didn't fail, but you'd like to get the part recoated, or upgrade to another coating, give us a call. One of our project team members will work with you to get you the best deal possible.

This warranty is non-transferable. Fill in below and keep for your records.
