

SLICOAT Products

GEAR & CAMCLAD™ oil attracting

Anti Friction Coating

(coefficient of friction 0.03)

GEAR & CAMCLAD is an excellent low friction dry film lubrication coating that helps eliminate galling and fretting on metallic mating surfaces for steel, stainless steel, cadmium, zinc, copper, and aluminum, magnesium and titanium alloys.

GEAR & CAMCLAD anti friction coating is a tough thermally bonded blend that will attract lubrication oils for the lowest resistance on surfaces. Gear and CAMCLAD is designed for high-load, low speed applications where low friction is required.

GEAR & CAMCLAD has excellent high & low temperature stability, chemical breakdown resistant to fuels, acids and bases, brake fluids, moisture and lubricating oils.

Temp Range: to 715° F

Color: Dark Grey

Jet Hot GEAR & CAMCLAD Benefits

(0.000118- 0.000590" applied thicknesses)

- High corrosion protection
- Friction reduction reduces temperatures
- Low friction increases part life
- Non dust attracting
- Oil attracting, low resistance

LIMITED WARRANTY – SLICOAT® Coatings- Jet Hot believes that the above is an accurate description of the typical characteristics and or uses of Jet Hot SDF product, recommended for general use for product satisfaction. Jet Hot's sole warranty is that the product or products will meet Jet Hot's coating applications standard for high quality, free from defects for applied material, however Jet Hot SDF coatings are subject to sacrificial wear depending on intensity and duration of use.

JET HOT SPECIFICALLY DISCLAIMS ANY OTHER EXPRESSOR IMPLIED WARRANTY, INCLUDING THE WARRANTIES OF MERCHANTABILITY AND OF FITNESS FOR USE. Your exclusive remedy and JET HOT's sole liability for breach of warranty is limited to refund of the purchase price or replacement of any product shown to be other than as warranted, and JET HOT expressly disclaims any liability for consequential damages.
